New lookup

Enter the error code shown on the machine screen and I'll walk you through troubleshooting it step by step.

E-204

F-118

P-330

S-045

E-204

Got it — pulling up the troubleshooting flow for E-204.

E-204 CONVEYOR SYSTEM · ZONE 1

Conveyor Belt Jam / Motor Overload

LIKELY CAUSES

- Foreign object obstructing belt travel
- Belt tensioner roller out of alignment
- Drive motor overload relay tripped

1 Press E-STOP and confirm the conveyor has fully stopped before approaching the belt.

Do not reach into the belt path while it is powered — lock out per SOP-14 if you'll be working near the drive.

This fixed it

Still not working

Enter the error code shown on the machine screen...

Try E-204, F-118, P-330, S-045 — or type any code from the HMI panel.
